## **Miniature Waterproof Plastic Connectors**

HR30 Series

#### Features

#### 1. Small size

Short in length when fully terminated and mated.

#### 2. Water and dust protected

IP67 protection rating: Complete protection against dust penetration and against water penetration when submerged 1 meter deep for half hour. Mated with corresponding connector or protective cap.

#### 3. Simple pull lock release

Built-in lock/release mechanism securely locks mated connectors while allowing quick disconnection by simply pulling on the plug's release collar. Molded-in grooves prevent hand slippage when pulled.

The round configuration of the collar allows easy side-byside panel mounting and will not snag on objects when the cable is pulled-out.

#### 4. Light weight, corrosion resistant

Glass reinforced thermoplastic compounds and noncorrosive components are used in all assemblies.

#### 5. Contact protection and self- alignment

Multiple polarizing keys protect the contacts from missalignment or attempted insertion of the wrong connector, while assuring correct mating between the corresponding connectors.

#### 6. Visual alignment indicators

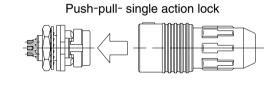

Permanent alignment indicators in a contrasting color on all connectors aid in correct alignment and engagement.

#### 7. Built-in cable strain relief

#### Applications

Test and measuring equipment, portable devices, instrumentation, industrial devices, recreational equipment, I/O applications and other applications requiring use of lightweight, corrosion resistant quick mate/ release cable connections.

#### Lock/release operation

## Product Specifications

Potingo	Current rating	5A (3 pos.) 2A (6,10,12 pos.)	Operation Temperature Range	-25℃ to +85℃
Raungs	Voltage rating	100V AC,140V DC(3,6 pos.) 30V AC,42V DC(10,12 pos.)	StorageTemperature Range	-25℃ to +85℃

Characteristic	Specification	Conditions
1.Contact resistance	5m ohms max. (3 pos.) 15m ohms max. (Solder type: 6, 10, and 12 pos.) 30m ohms max. (Through hole type: 6 and 12 pos.)	1A DC
2.Insulation resistance	1000M ohms min.	100 V DC
3.Withstanding voltage	No flashover or insulation breakdown	300 V AC / one minute
4.Vibration	No electrical discontinuity of 10 $\mu$ s or more	Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 1 cycle= 5min, 10 cycles in each of the 3 directions.
5.Durability (mating/un-mating)	Contact resistance 10m ohms min.(3 pos.) Contact resistance 30m ohms min. (Solder type: 6, 10, and 12 pos.) Contact resistance 100m ohms min. (Through hole type: 6 and 12 pos.)	1000 cycles
6.Temperature cycle	Insulation resistance 100 M ohms min.	(-55°C: 30 minutes → Room temperature: 10 to 15 minutes → +85°C: 30 minutes → Room temperature: 10 to 15 minutes) for 5 cycles
7.Humidity resistance	Insulation resistance 10M ohms min. (when humidity high) 100M ohms min. (when dry)	96 hours at temperature of 40ohmsC and humidity of 90% to 95%
8.Waterproof performance	No penetration inside.	While mated with corresponding or protective cap submerged at
9.Dust protection		depth of 1m for half hour.

## Connecting Combinations

Note 1 : When selecting connectors, take into account the shell size, contact count and gender of the contacts.

Note 2 : When using the protective caps for the receptacles, do not use the gaskets normally supplied with the receptacle. Protective caps must be fully inserted to assure specified IP67 water and dust protection.

## Receptacle, Board Mounting Through Hole Pattern

Notes 1.The receptacle through hole configuration depicts a view from the mating side of the connector.

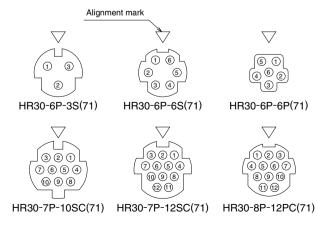

2.The recommended board maximum thickness :1.2 mm.

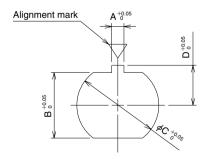

3. Tolerance of +0.03 mm is recommended for the plated through hole location.

Tolerance of +0.02 mm is recommended for the plated through hole diameter.

## Contact Position Arrangement

	А	В	С	D	Panel Thishness
3,6 pos	1.25	6.45	8.05	3.95	0.7~2
10,12 pos	1.35	9.25	11.05	5.45	0.7~3

Notes 1. The contact configuration depicts a view from the wiring side.

2. Mounting to the panel is accomplished by tightening the hexagonal nut from the rear side of the panel.

## Assembly Procedures

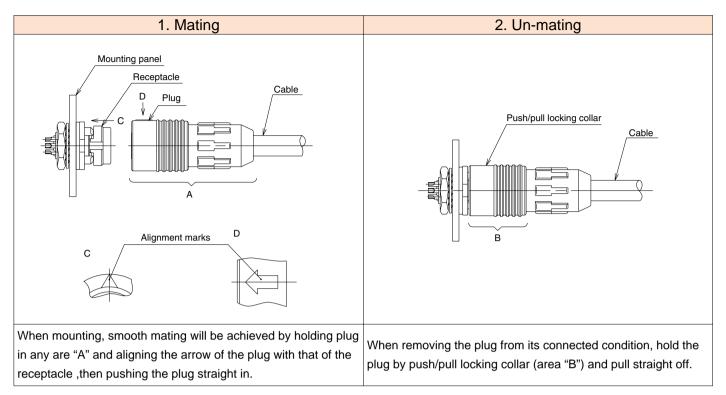

- 1. To prevent accidental loosening of the back shell it is recommended that a small amount of primer (Loctite® 7649) and adhesive (Loctite® 271) be applied to the threads of the insulator body before proceeding.
- 2. Keeping the terminated insulator body on the fixture, re-assembly the plug in order shown.
- 4. Using the correct back-tightening collar tighten the back shell to the specified torque. When tightening the collar make sure that the cable will NOT turn.
- 5. Remove the assembly from the fixture.

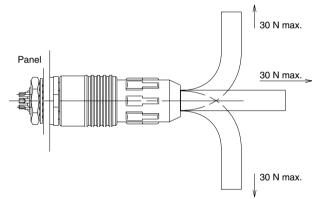

Note: Loctite is a registered trademark of the Henkel Loctite Corporation.

## General usage notes

## Precautions

1. Do NOT apply force in excess of 30N in the directions shown below.

2. To maintain the water/dust protection performance and the cable clamp force, use a cable that is within the range of applicable cable diameter. 3. Consult HRS representative when using different cables.
