Product Description

The AH115 / ECP050 is a high dynamic range driver amplifier in a low-cost surface mount package. The InGaP/GaAs HBT is able to achieve high performance for various narrow-band tuned application circuits with up to +44 dBm OIP3 and +28.5 dBm of compressed 1-dB power. All devices are 100% RF and DC tested. The AH115 / ECP050 is available in lead-free/green/RoHS-compliant SOIC-8 package.

The product is targeted for use as driver amplifiers for wireless infrastructure where high linearity and medium power is required. The internal active bias allows the AH115 / ECP050 to maintain high linearity over temperature and operate directly off a +5 V supply. This combination makes the device an excellent fit for transceiver line cards and power amplifiers in current and next generation multi-carrier 3G base stations.

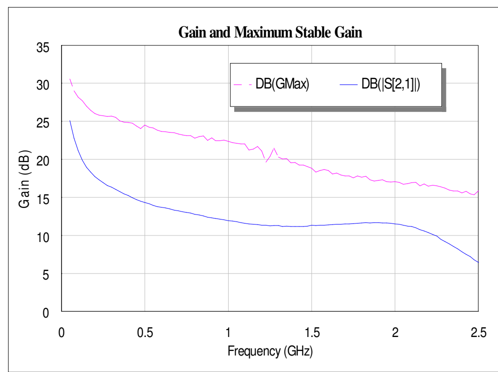
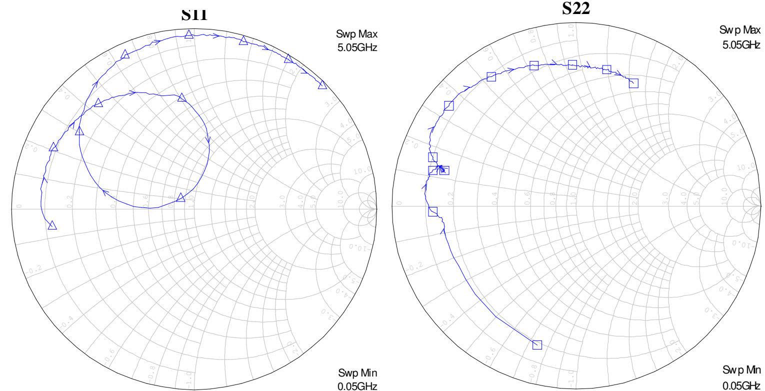
Typical Device Data

S-Parameters (V_{cc} = +5 V, I_{cc} = 250 mA, T = 25°C, unmatched 50 ohm system)





Notes:
The gain for the unmatched device in 50 ohm system is shown as the trace in black color. For a tuned circuit for a particular frequency, it is expected that actual gain will be higher, up to the maximum stable gain. The maximum stable gain is shown in the dashed red line. The return loss plots are shown from 50 – 5050 MHz, with markers placed at 0.5 – 5.05 GHz in 0.5 GHz increments.

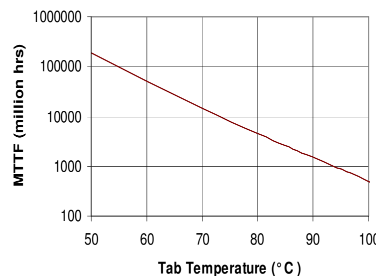
Thermal Specifications

Parameter	Rating
Operating Case Temperature	-40 to +85° C
Thermal Resistance [(1)], Rth	62° C / W
Junction Temperature [(2)], Tjc	162° C

Notes:

1. The thermal resistance is referenced from the junction-to-case at a case temperature of 85° C. Tjc is a function of the voltage at pins 6 and 7 and the current applied to pins 6, 7, and 8 and can be calculated by:
   Tjc = Tcase + Rth * Vcc * Icc
2. This corresponds to the typical biasing condition of +5V, 250 mA at an 85° C case temperature. A minimum MTTF of 1 million hours is achieved for junction temperatures below 247° C.



AH115-S8G (Green / Lead-free SOIC-8 Package) Mechanical Information

This package is lead-free/Green/RoHS-compliant. It is compatible with both lead-free (maximum 260°C reflow temperature) and leaded (maximum 245°C reflow temperature) soldering processes. The plating material on the leads is NiPdAu.
