1 mm Contact Pitch, Board-to-Cable, Board-to-FPC,

**Board-to-Micro-coaxial Cable Connectors** 

## **DF19** Series

(0.78)

17

Micro-coaxial cable

1.3±0.2

DF19G-\*S-1SD(05) +DF19G-\*S-1SD-GND

DF19-\*P-1V(56)

# 

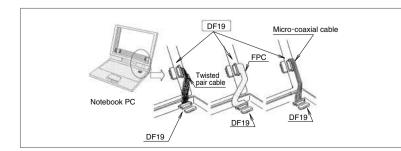

Industry and market accepted as "De facto" standard for LCD panel connections (panels under 12 inches). High-performance connectors for LVDS high-speed differential signals.

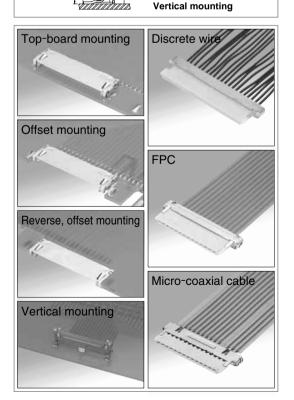

### **Features**

- **1. Small configuration and board space** Thin design accepts discrete wire, thin micro-coaxial cable (φ1.5mm, φ1.6mm max.) and FPC 1.7 mm maximum thick.
- 2. Common use of receptacle The same receptacle will accept plugs terminated with discrete wire, FPC or micro-coaxial cable.
- **3. Uniform external dimensions** The plug assembly external dimensions remain the same when is terminated with discrete wire, FPC or micro- coaxial cable.
- **4. Variety of mounting styles** Device design engineers have a choice of mounting styles: topboard, offset, reverse mount offset and vertical.
- 5. Ground connection Metal grounding plates connect with the common ground line.

### Applications

LCD connections in small consumer devices: digital cameras, notebook computers, PDA's. Any device requiring high-density interconnection for consistent high speed transmission data rates.

The product information in this catalog is for reference only. Please request the Engineering Drawing for the most current and accurate design information. All non-RoHS #79/05e have been discontinued accurate for block and the second state of the second search and the second

### ■Product Specifications

	Current rating	AWG#28 : 1A				
		AWG#30 : 0.9A				
		AWG#32 : 0.8A	Operating temperature range	-35℃ to 85℃ Note 1	Storage temperature range	-10℃ to 60℃ Note 2
Rating		AWG#36 : 0.5A		Note 2		
		FPC : 0.5A	Operating humidity range	20% to 80%	Storage humidity range	40% to 70%
		Micro-coaxial cable AWG# 40: 0.3A				
	Voltage rating	100V AC				

Item	Specification	Conditions				
1.Insulation resistance	500 MΩ min.	100 V DC				
2.Withstanding voltage	No flashover or insulation breakdown.	300 V AC / one minute				
3.Contact resistance	30 m $\Omega$ max. (50 m $\Omega$ max. for FPC)	100 mA				
4.Insertion-Extraction force (per contact)	Min. 0.2N, Max. 3N	Measured with a steel pin $\phi$ 0.2 $\pm$ 0.005				
5.Vibration	No electrical discontinuity of $1\mu$ s or more.	Frequency: 10 to 55 Hz, single amplitude of 0.75 mm, 2 hours in each of the 3 directions.				
6.Humidity (Steady state)	Contact resistance: 30 m $\Omega$ max. (50 m $\Omega$ max. for FPC) Insulation resistance: 500 M $\Omega$ min.	96 hours at temperature of 40±2℃ and humidity of 90% to 95%				
7.Temperature cycle	Contact resistance: 30 m $\Omega$ max. (50 m $\Omega$ max. for FPC) Insulation resistance: 500 M $\Omega$ min.	$\begin{array}{rrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrrr$				
8.Durability (insertion/ withdrawal)	Contact resistance: 30 m $\Omega$ max. (50 m $\Omega$ max. for FPC)	30 cycles				
9.Resistance to soldering heat	No deformation of the insulator parts affecting performance.	Re-flow soldering: At the recommended temperature profile Manual soldering: Soldering iron temperature 300°C, 3 seconds				

Note1: Includes temperature rise caused by current flow.

Note2: The term "storage" refers to connectors stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non- conducting condition of installed connectors in storage, shipment or during transportation.

Note3: Information contained in this catalog represents general requirements for this Series. Contact us for the drawings and specifications for a specific part number shown.

### Materials / Finish

Product	Component	Material	Finish/Color	Remarks

All non-RoHS products have been discontinued, or will be discretived frequency of the accurate design information and accurate design information.

### Plug (FPC Type) Termination Procedures (Dedicated Assembly Tooling is required.)

Step 1	Insert the FPC diagonally from the top surface of the grounding plate. Pass the FPC through the grounding plate.
After	passing through, lower the FPC (as shown) to horizontal position.
Step 2	Signal surface Ground surface
Step 3	Extend the FPC out and fully insert into the socket.
Step 4	
	Assembly point: Slightly raise the FPC to an angle of about 30 degrees, and then insert the grounding plate over the socket.
Final completion	Using the dedicated installation tool, insert the grounding plate.

Note 1: The grounding plate and the plug are supplied as separate components.

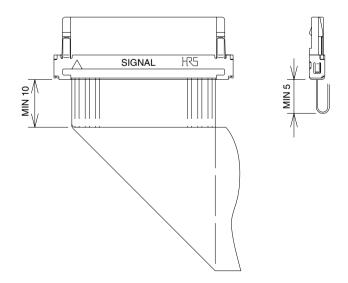

Note 2: Dedicated assembly fixtures are required at each stage of the termination process. For detail, refer to the instruction manual supplied with the tools.

Note 3: Do not apply excessive forces to FPC (Bending or twisting) as it may introduce cracks in the copper foil (on the cover film edge).

Note 4: To protect the FPC, insertion and disconnection of the connectors should be performed parallel to the mating direction.

Note 5: Do not apply excessive tension to FPC.

Note 6: Refer to FPC manufacturer for bend radius and other specific recommendation. Distance should be allowed for the bending position, as illustrated below.

Note 7: Follow the instruction manuals for the termination and assembly fixtures and tools.
