World's smallest & lightest

0.5mm pitch, 0.9mm above the board, Flexible Printed Circuit & Flexible Flat Cable Connectors

FH19 & FH19S Series

Features

World's smallest & lightest

1. Low-profile 0.5mm pitch FPC, FFC Connectors

Miniaturization of portable equipment and personal mobile devices has created increased demand for a low profile, high density, and high reliability connectors.

*The design of this connector has been made thinner and smaller, with a height of 0.9mm and width of 3mm.

[As of August 2002, this is the smallest connector of this type available on the market !]

*PCB footprint: Reduced approximately 48% (as compared with Hirose Electric's 0.5mm pitch FH12 Series connectors)

*Connector weight: Reduced approximately 78% (as compared with Hirose Electric's 0.5mm pitch FH12 Series connectors)

2. Conductive traces on the PCB can be designed to run under the connector

All bottom surface of the connector is solid, without any exposure of the contact.

3. Proven Flip-Lock Actuator System assures easy and reliable operation

Rotating actuator permits easy insertion and reliable connection with the FPC & FFC.

Tactile sensation confirms complete mechanical locking of the actuator and the electrical connection.

4. Accepts 0.2mm & 0.3mm thick FPC, FFC

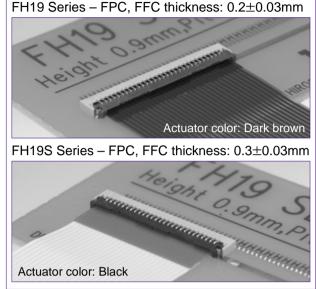

Accepts 0.2mm & 0.3mm thick FPC, FFC, easy inserted in the connector.

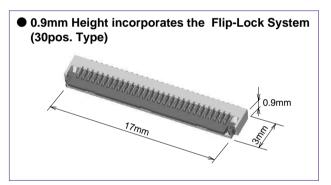

The connector will also terminate successfully with 0.2mm thick Flat Flexible Cable (FFC).

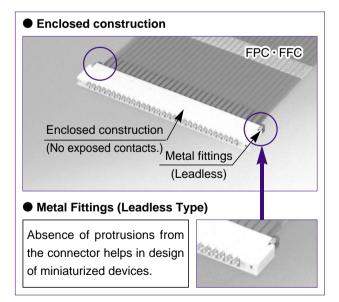

5. Designed for placement with automatic equipment Packaged in embossed tape, on reel. One reel contains 5,000 pieces.

6. Environmental considerations

The center cores of the embossed tape reels are made of paper, unlike typical cores made of styrofoam.

Applications

Notebook PC's, PDA's, digital cameras and other compact devices requiring interconnections of the main circuit board with the LCD, plasma display (PDP), HDD or other devices.

Temperature cycle Insulation resistance: 100 M ohms min. 5 cycles

Note 1: Includes temperature rise caused by current flow.

Note 2: The term "storage" refers to products stored for long period of time prior to mounting and use. Operating Temperature Range and Humidity range covers non- conducting condition of installed connectors in storage, shipment or during transportation.

Reflow: At the recommended temperature profile

Manual soldering: 350℃±5℃ for 5 seconds

Note 3: When FPC is gold plated, the connector contacts should be also gold plated: Select the (05) specification.

No deformation of components affecting performance.

No damage, cracks, or parts dislocation.

Connector Operating Instructions, Precautions and Recommendations

Operation	Precautions
 FPC/FFC Termination procedure. Connector installed on the board. Lift up the actuator. Use thumb or index finger. 	 Do not apply excessive force or use any type of tool to operate the actuator.
 Rotate down the actuator until firmly closed. It is critical that the inserted FPC/FFC is not moved and remains fully inserted. Should the FPC/FFC be moved, open the actuator and repeat the process, starting with Step 1 above. 	 The connector will assure reliable performance when the actuator is open to 130° maximum (see fig.1) Do not exceed this angle, as this may cause permanent damage to the connector.
 2. FPC/FFC Removal 1) Lift up the actuator. 2) Carefully remove the FPC/FFC. 	 Assure that the FPC/FFC is fully inserted parallel to mounting surface, with the exposed conductive traces facing down.

Connector Dimension

[FH19 Series]

Notes $\boxed{1}$ The coplanarity of each terminal lead and metal fitting is within 0.1

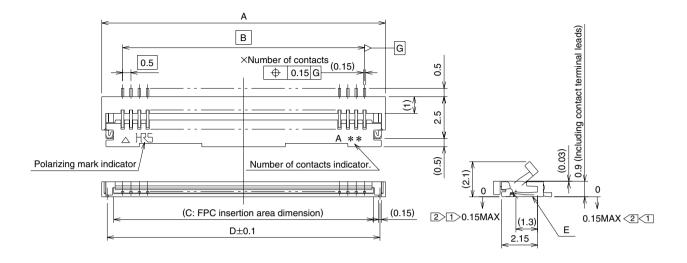

- $\overline{|2\rangle}$ The contact terminal lead position indicates the dimension from the E surface, the bottom surface of the insulator body.
- 3 The connector is supplied in embossed tape packaging. For details see the Packaging Specifications.
- 4 Any discoloration of the plastic compound will NOT AFFECT form, fit or function of the connector.

Recommended PCB Land and Metal Mask Dimensions

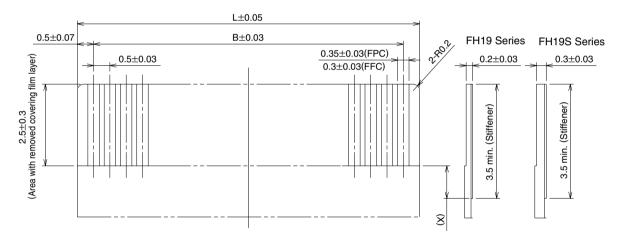

[Common to FH19 & FH19S Series]

Recommended metal mask thickness: 0.10 mm.

Recommended FPC, FFC Dimensions

[Common to FH19 & FH19S Series]

Note1: Polyamide and a thermally hardened adhesive is recommended as the materials for the stiffener. Note2: Y dimension should be 1.5mm min., and X dimension should be 1.5mm for improved flexibility of FPC.

Recommended Temperature Profile

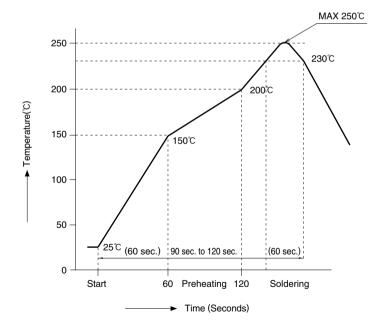

[For FH19 & FH19S Series]

•Using Typical Solder Paste

HRS test conditions Solder method :Reflow, IR/hot air (Nihon Den-netsu Co., Ltd.'s Part Number: SENSBY NR- ${\mathbb I}$) Environment :Room air Solder composition :Paste, 63%Sn/37%Pb (Senju Metal Industry, Co., Ltd.'s Part Number: OZ63-201C-50-9) Test board :Glass epoxy 45mm×100mm×1.6mm thick Land dimensions :0.3mm×0.8mm Metal mask :0.25mm×0.8mm×0.1mm thick

This temperature profile is based on the above conditions. In individual applications the actual temperature may vary, depending on solder paste type, volume/thickness and board size/thickness. Consult your solder paste and equipment manufacturer for specific recommendations.
