4-bit Bidirectional Universal Shift Register

REJ03D0589–0200 (Previous ADE-205-466) Rev.2.00 Jan 31, 2006

Description

This bidirectional shift register is designed to incorporate virtually all of the features a system designer may want in a shift register. It features parallel inputs, parallel outputs, right shift and left shift serial inputs, operating mode control inputs, and a direct overriding clear line. The register has four distinct modes of operation: parallel (broadside) load, shift right (in the direction Q_A toware Q_D); shift left; inhibit clock (do nothing).

Synchronous parallel loading is accomplished by applying the four bits of data and taking both mode control inputs, S_0 and S_1 , high. The data are loaded into their respective flip-flops and appear at the outputs after the positive transition of the clock input. During loading, serial data flow is inhibited. Shift right is accomplished synchronously with the rising edge of the clock pulse when S_0 is high and S_1 is low. Serial data for this mode is entered at the shift right data input. When S_0 is low and S_1 is high, data shifts left synchronously and new data is entered at the shift left serial input. Clocking of the flip-flops is inhibited when both mode control inputs are low. The mode control inputs should be changed only when the clock input is high.

Features

- High Speed Operation: t_{pd} (Clock to Q) = 12 ns typ ($C_L = 50 \text{ pF}$)
- High Output Current: Fanout of 10 LSTTL Loads
- Wide Operating Voltage: $V_{CC} = 2 \text{ to } 6 \text{ V}$
- Low Input Current: 1 µA max
- Low Quiescent Supply Current: I_{CC} (static) = 4 μ A max
- Ordering Information

| Part Name | Package Type | Package Code (Previous Code) | Package Abbreviation | Taping Abbreviation (Quantity) |
|------------|--------------|---------------------------------|-------------------------|-----------------------------------|
| HD74HC194P | DILP-16 pin | PRDP0016AE-B (DP-16FV) | Ρ | _ |

Function Table

| Our constitue of | | | | | Inpu | ts | | | | | Outputs | | | |
|---------------------|-------|----------------|----------------|--------|------------------------|----------|-----|---|---|---------|------------------|-----------------|-----------------|-----------------|
| Operating Mode C | Clear | Mode | | Clock | Se | Parallel | | | | Outputs | | | | |
| Widde | Clear | S ₁ | S ₀ | CIOCK | Shift Left Shift Right | | A B | | С | D | \mathbf{Q}_{A} | QB | Qc | QD |
| Clear | L | Х | Х | Х | Х | Х | Х | Х | Х | Х | L | L | L | L |

| | Н | Х | Х | Н | Х | Х | Х | Х | Х | Х | Q _{A0} | Q _{B0} | Q _{C0} | Q _{D0} |

H : high level (Steady state)

L : low level (Steady state)

X_: don't care

 \int : transition from low to high level.

a, b, c, d : the level of steady-state input at inputs A, B, C or D respectively.

 $Q_{A0}, Q_{B0}, Q_{C0}, Q_{D0}: the level of Q_A, Q_B, Q_C or Q_D respectively, before the indicated steady-state input conditions were established.$

 $Q_{An}, Q_{Bn}, Q_{Cn}, Q_{Dn}$: the level of Q_A, Q_B, Q_C or Q_D respectively before the most recent \int transition of the clock.

Absolute Maximum Ratings

| Item | Symbol | Ratings | Unit |
|-------------------------------|-------------------------------------|------------------------------|------|
| Supply voltage range | V _{CC} | -0.5 to 7.0 | V |
| Input / Output voltage | V _{IN} , V _{OUT} | –0.5 to V _{CC} +0.5 | V |
| Input / Output diode current | I _{IK} , I _{OK} | ±20 | mA |
| Output current | lo | ±25 | mA |
| V _{CC} , GND current | I _{CC} or I _{GND} | ±50 | mA |
| Power dissipation | PT | 500 | mW |
| Storage temperature | Tstg | -65 to +150 | °C |

Note: The absolute maximum ratings are values, which must not individually be exceeded, and furthermore, no two of which may be realized at the same time.

| Item | Symbol | Ratings | Unit | Conditions |
|--------------------------------------|------------------------------------|----------------------|------|------------------|
| Supply voltage | V _{CC} | 2 to 6 | V | |
| Input / Output voltage | V _{IN} , V _{OUT} | 0 to V _{CC} | V | |
| Operating temperature | Та | -40 to 85 | °C | |
| Input rise / fall time ^{*1} | t _r , t _f | 0 to 1000 | ns | $V_{CC} = 2.0 V$ |
| | | 0 to 500 | | $V_{CC} = 4.5 V$ |
| | | 0 to 400 | | $V_{CC} = 6.0 V$ |

Recommended Operating Conditions

Notes: 1. This item guarantees maximum limit when one input switches. Waveform: Refer to test circuit of switching characteristics.

Keep safety first in your circuit designs! 1. Renesas Technology Corp. puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage. Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of nonflammable material or (iii) prevention against any malfunction or mishap.

- Notes regarding these materials
 1. These materials are intended as a reference to assist our customers in the selection of the Renesas Technology Corp. product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Renesas Technology Corp. or a third party.
 2. Renesas Technology Corp. assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
 3. All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Renesas Technology Corp. without notice due to product improvements or other reasons. It is therefore recommended that customers contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor for the latest product information before purchasing a product listed herein.
 The information described here may contain technical inaccuracies or typographical errors. Renesas Technology Corp. asyumes no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors. Please also pay attention to information published by Renesas Technology Corp. by various means, including the Renesas Technology Corp. Semiconductor home page (http://www.renesas.com).
 4. When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to

- Nonne page (http://www.renessas.com).
 4. When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Renesas Technology Corp. assumes no responsibility for any damage, liability or ther loss resulting from the information contained herein.
 5. Renesas Technology Corp. semiconductors are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact Renesas Technology Corp. or an authorized Renesas Technology Corp. product distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.
- use. 6. The prior written approval of Renesas Technology Corp. is necessary to reprint or reproduce in whole or in part these materials. 7. If these products or technologies are subject to the Japanese export control restrictions, they must be exported under a license from the Japanese government and cannot be imported into a country other than the approved destination. Any diversion or reexport contrary to the export control laws and regulations of Japan and/or the country of destination is prohibited. 8. Please contact Renesas Technology Corp. for further details on these materials or the products contained therein.
