

Pyroelectric Infrared Detectors

Dual Element Detector LHi 333

Dual Element Detector

Special Flat Pack Housing

Designed for Multi-Sensor Arrangements

The **LHi 333** pyroelectric infrared-detector series is specially designed for Light switching applications with many detectors working in parallel for a wide field of view. It includes a dual element pyroelectric ceramic element with FET in source follower connection.

This detector is fit with an infrared filter 5...14 μm . It offers high responsivity with excellent common mode performance (match) and low noise.
