DESCRIPTION

The M74HC253 is an high speed CMOS DUAL 4 CHANNEL MULTIPLEXER fabricated with silicon gate C^2MOS technology.
Each of these data (1C0-1C3, 2C0-2C3) is selected by the two address inputs A and B. Separate strobe inputs ($1\overline{G}$, $2\overline{G}$) are provided for each of the two four-line sections. The strobe input ($n\overline{G}$) can be used to inhibit the data output; the output of M74HC253 is a high impedance while the strobe input is held high.
All inputs are equipped with protection circuits against static discharge and transient excess voltage.
