Dual 4 to 1 Multiplexer

The MC10174 is a high speed dual channel multiplexer with output enable capability. The select inputs determine one of four active data inputs for each multiplexer. An output enable forces both outputs low when in the high state.

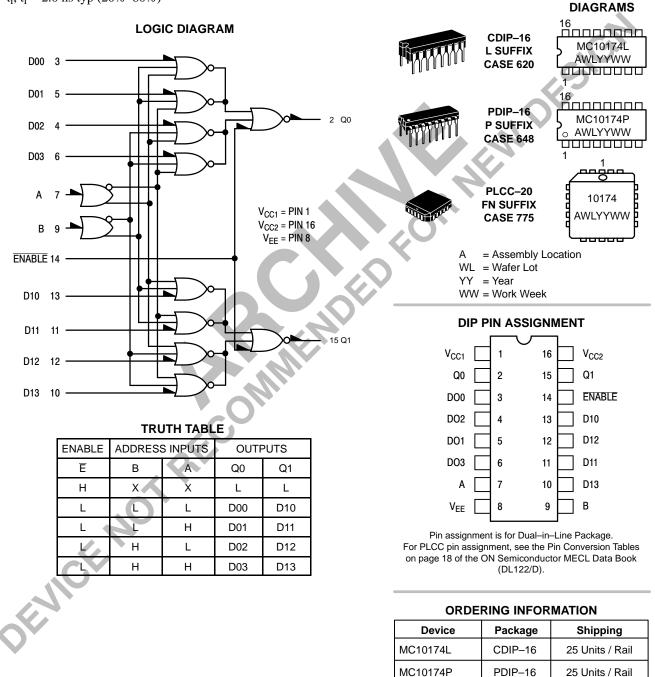

- $P_D = 305 \text{ mW typ/pkg}$ (No Load)
- $t_{pd} = 3.5$ ns typ (Dta to output)
- t_r , $t_f = 2.0$ ns typ (20%-80%)
