

DESCRIPTION

The PT2312E is an audio processor designed for versatile application, includes 4 stereo input selector with adjustable gain, master volume control with low frequency loudness compensation, individual output attenuator and tone control. It is a good solution for the car audio signal processing.

Due to the high reliability requirement from the audio business, the PT2312E improves both audio performances and input surge current capability, these causes the PT2312E is the best solution for the cost-effective audio systems.

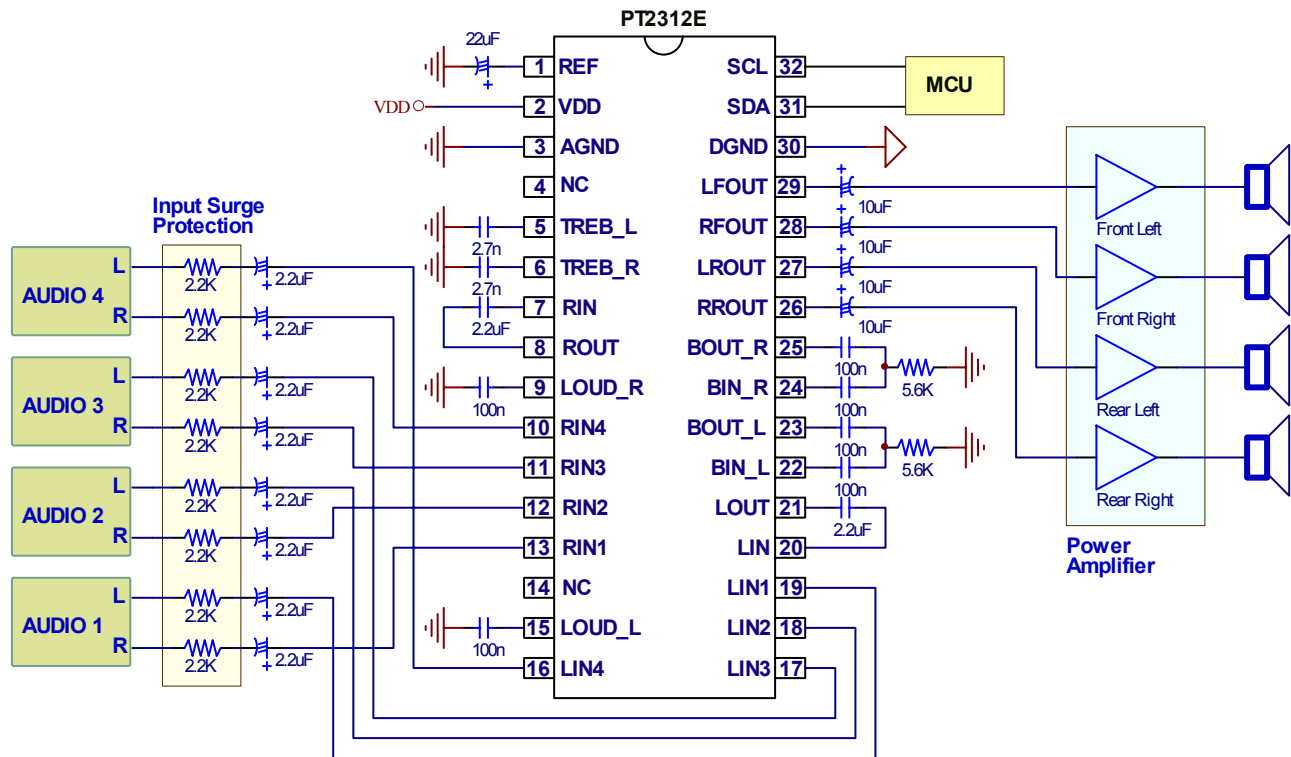

FEATURES

- 4 stereo inputs with gain selection, range from 0dB to +11.25dB in 3.75dB/step
- Master volume from 0 dB to -78.75dB in 1.25dB/step
- Speaker attenuator for balance and fader, range from 0dB to -38.75dB in 1.25dB/step
- Each channel output can be muted individually.
- Low frequency loudness compensation
- Bass and Treble control, range from -14dB to +14dB in 2dB/step
- Wide operation range (VDD=4V to 10V)
- Improved and replace PT2312 and PT2312A

APPLICATIONS

- Car Audio
- Home Audio System
- Powered Speaker System

APPLICATION CIRCUIT

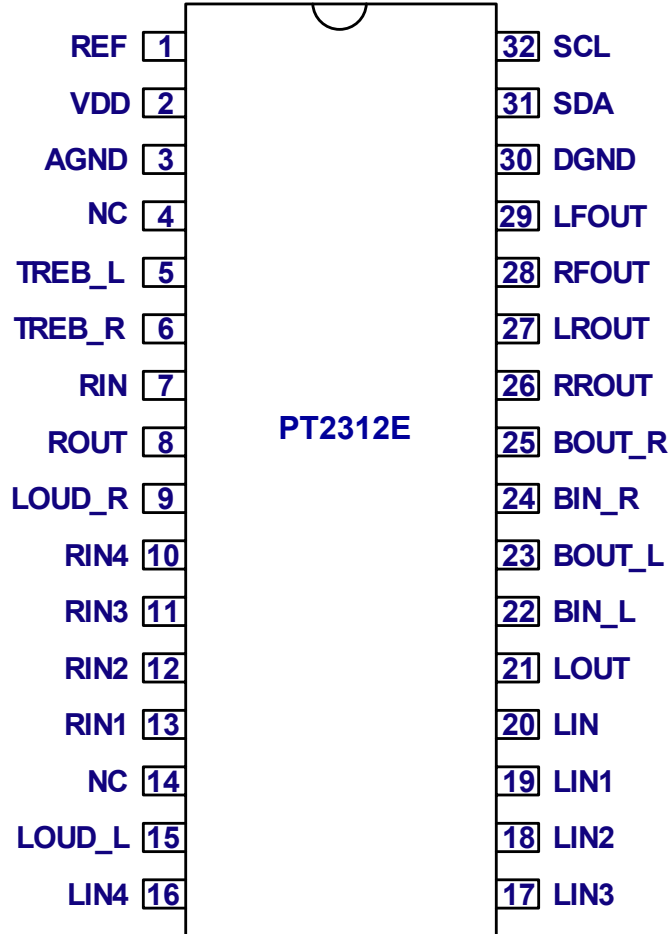

BLOCK DIAGRAM

ORDER INFORMATION

| Valid Part Number | Package Type | Top Code |
|-------------------|----------------------|----------|
| PT2312E-S | 32 Pins, SOP, 300mil | PT2312E |

PIN CONFIGURATION

PIN DESCRIPTION

| Pin Name | I/O | Description | Pin No. |
|----------|-----|------------------------------|---------|
| REF | - | Reference voltage | 1 |
| VDD | - | Supply input | 2 |
| AGND | - | Analog ground | 3 |
| NC | - | No Connect | 4 |
| TREB_L | I | L-CH treble input | 5 |
| TREB_R | I | R-CH treble input | 6 |
| RIN | I | R-CH volume input | 7 |
| ROUT | O | R-CH mux output | 8 |
| LOUD_R | I | R-CH loudness input | 9 |
| RIN4 | I | R-CH input 4 | 10 |
| RIN3 | I | R-CH input 3 | 11 |
| RIN2 | I | R-CH input 2 | 12 |
| RIN1 | I | R-CH input 1 | 13 |
| NC | - | No Connect | 14 |
| LOUD_L | I | L-CH loudness input | 15 |
| LIN4 | I | L-CH input 4 | 16 |
| LIN3 | I | L-CH input 3 | 17 |
| LIN2 | I | L-CH input 2 | 18 |
| LIN1 | I | L-CH input 1 | 19 |
| LIN | I | L-CH volume input | 20 |
| LOUT | O | L-CH mux output | 21 |
| BIN_L | I | L-CH bass input | 22 |
| BOUT_L | O | L-CH bass output | 23 |
| BIN_R | I | R-CH bass input | 24 |
| BOUT_R | O | R-CH bass output | 25 |
| RROUT | O | Right rear output | 26 |
| LROUT | O | Left rear output | 27 |
| RFOUT | O | Right front output | 28 |
| LFOUT | O | Left front output | 29 |
| DGND | - | Digital ground | 30 |
| SDA | I | I ² C data input | 31 |
| SCL | I | I ² C clock input | 32 |

* Pin 4 in the PT2312 and PT2312A is for "CODE" function and always pull-high by external connection, the PT2312E modified to internally pull-high so pin 4 becomes to NC status.

IMPORTANT NOTICE

Princeton Technology Corporation (PTC) reserves the right to make corrections, modifications, enhancements, improvements, and other changes to its products and to discontinue any product without notice at any time.

PTC cannot assume responsibility for use of any circuitry other than circuitry entirely embodied in a PTC product. No circuit patent licenses are implied.
