# AlGaAs laser diode RLD-78MD

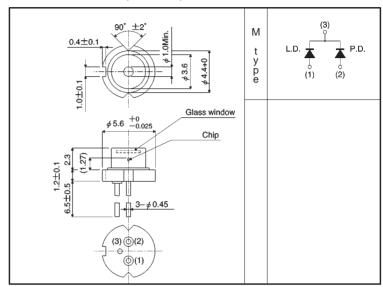

The RLD-78MD is a laser diode designed for minidisc playback. This device has low noise at high optical output levels.

## ApplicationsMinidisc (MD) playback

#### Features

- 1) Optical output is high at 4 to 8 mW.
- 2) Reduced facet reflection.
- 3) High-precision, compact package.
- 4) General purpose polarity type is available. (M type)

### External dimensions (Units: mm)

#### ● Absolute maximum ratings (Tc = 25°C)

| Parameter             |                | Symbol   | Limits               | Unit |
|-----------------------|----------------|----------|----------------------|------|
| Output                |                | Po       | 10                   | mW   |
| Reverse<br>voltage    | Laser          | VR       | 2                    | ٧    |
|                       | PIN photodiode | VR (PIN) | 30                   | ٧    |
| Operating temperature |                | Topr     | -10~ <del>+</del> 60 | °C   |
| Storage temperature   |                | Tstg     | -40~+85              | °C   |
