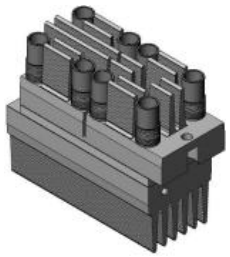
SKKQ 1200

THYRISTOR BRIDGE,SCR,BRIDGE



SEMiSTART

Antiparallel thyristors for softstart

SKKQ 1200

Features

- Compact design
- Thyristor with amplifying gate
- Pressure contact technology

Typical Applications*

- Soft Starters

Remarks

- Please note: This module has no soft mold protection around the chip. It is therefore susceptible to environmental influences (dust, humidity, etc.). The humidity test according to IEC60068-2-67 is not passed by this product.
- Recommendation: The devices should be installed in control cabinets of IP54 degree of protection.

1) T_{vjmax} up to 150°C is allowable for overload conditions, max. time period for the overload condition is 20s.
