

# TMR2701

High Sensitivity and Low Hysteresis TMR linear sensor

## **General Description**

The TMR2701 linear sensor utilizes a unique push-pull Wheatstone bridge composed of four unshielded TMR sensor elements. The unique bridge design provides a high sensitivity differential output that is linearly proportional to a magnetic field applied parallel to the surface of the sensor package, and it provides superior temperature compensation of the output. The TMR2701 is available a 6mm X 5mm X 1.5mm SOP8 package.

#### **Features and Benefits**

- Tunneling Magneto resistance (TMR) Technology
